# Autism Awareness Crossword Puzzle

Complete the activity.

## ACROSS

- Occurs most often in girls - unlike autism, girls initially show normal development, then revert.  
- [Retts Syndrome](#)
- On the Autism Spectrum, defined by impairments in communication and social development and by repetitive interests and behaviors but having no significant delay in language and cognitive development.  
- [Aspergers Syndrome](#)
- Some kids with autism play differently, have trouble making eye contact and have trouble making friends.  
- [Social Interaction Problems](#)
- Many children with autism are on special diets, which may include eliminating dairy, wheat and other foods.  
- [Dietary Intervention](#)
- Some kids with autism may have trouble talking, make strange sounds, or not talk at all.  
- [Communication Problems](#)

## DOWN

- A neurological disorder that affects the normal development of communication and social skills.  
- [Autism](#)
- Helps kids overcome or adjust to many difficulties, including speech, living skills and social skills.  
- [Therapists](#)
- Self Stimulatory Behavior - repetitious behaviors that seem pointless to people without autism.  
- [Stimming](#)

Asperger's Syndrome	Social Interaction Problems	Dietary Intervention
Rett's Syndrome	Autism	Therapists
Communication Problems	Stimming
